About us

Bellvitge Clinical Research is a consolidated department exclusively dedicated to conducting both **clinical trials** and **observational studies**.

We are pioneers in conducting studies in **Minority Diseases, Neurosciences, Infectious Diseases and HIV, Nephrology, Transplantation, Cardiovascular Pathologies, Pulmonary Fibrosis, and Ophthalmology**, which promise a better health for patients.

History

We formally established **a team entirely dedicated to Clinical Research in 2017.**

Since then,

We have performed:

+1,000 studies

We have worked with:

+100 different
pharmaceutical companies

The origins of our expertise in Clinical Research go back to 2001 when we started conducting pharmacological studies as a unit of the **Hospital Universitari de Bellvitge (HUB)**. After furthering our expertise, we expanded our capacities and started conducting all phases of clinical trials and observational studies.

Clinical Research Support

We deliver excellence in the conduct of clinical trials and observational studies

Our virtues are efficiency and expertise

We have the capacity to bear up to **400 trials** simultaneously

Our team and facilities are set up to manage multiple trials and we incorporate **100 new trials annually**.

We streamline all the stages of a clinical trial

- 1 Administrative support
- 2 Specific needs and Collaboration agreements
- 3 Contract signature
- 4 Clinical Trial execution
- 5 Preparation of medical drugs
- 6 Results delivery

We count with direct acces to specific services from the Hospital Universitari de Bellvitge (HUB) to conduct trials

Our department issues collaboration agreements with different HUB units to make them available for the trials.

We offer specialized professionals and dedicated facilities to clinical research

Our team has specialized professionals in clinical research administration, execution and pharmacology.

Our clinical research facilities occupy **1,000 m2** assigned to trials execution. These include:

- 9 doctor offices for regular checks
- A day hospital
- 4 beds to house up clinical trial subjects for short stays
- Pharmacology dedicated area

Specific Services

1
