

Technical Office Engineer

Technical Office, Projects and Works · Hospital Universitari de Bellvitge

Hospital Universitari de Bellvitge is a high-complexity hospital with areas of excellence in patient care, biomedical research, innovation and health sciences education, with a team of more than 5,000 professionals.

Would you like to put your engineering skills to work on a project with a real impact on people's health? The Technical Office, Projects and Works department is looking for an engineer to join a team of excellence driving the continuous improvement of the hospital's facilities and infrastructure.

What will you do?

- › Drive hospital facilities and infrastructure projects, taking part in their development, monitoring and execution.
- › Coordinate with clinical teams, technical staff and suppliers to turn clinical needs into efficient, high-quality technical solutions.
- › Contribute to improving and modernising the hospital's spaces and services, applying quality, safety and sustainability criteria.

Essential requirements

- › Engineering degree with professional accreditation.
- › Catalan.
- › 3 years' experience in similar roles.

Desirable

- › Knowledge of technical calculation and management software (Arquimedes, Cype, Dialux or similar).
- › Skills: service orientation, teamwork, communication, flexibility and problem-solving ability.

What we offer

- › Joining high-impact projects at a leading university hospital.
- › A multidisciplinary environment with real opportunities for learning and professional development.
- › Monday to Friday, 8am to 3pm, plus one afternoon a week. 1,599 hours a year, 23 working days of holiday and 6 personal days.

Pay

- › €37,627.74 gross per year. Does not include objectives-based pay.

How to apply

- › By email: seleccio@bellvitgehospital.cat
- › Stating “**Technical Office**” in the subject line of the email.
